## RENEKA R80

Professional Premium

Experience a new kind of extraction technology. The new Reneka R80, an espresso machine for the demanding barista

## Description

The Reneka R80 embodies the concept of 'high tech' – more than 80 years of experience in design and production lies behind this espresso machine. It starts with the concept of a product, the wheels grind into motion, exclusive technologies are combined, and the end product is the Reneka R80. The essential tool to provide you with excellence and enjoyment!

The R80 will surprise you with its uncompromising performance features combined with a high degree of elegant design. The dynamic contours of the exterior shell along with the integrated high-tech components make the R80 something quite unique. Our motivated team has a passion for producing the perfect espresso extraction.

## Features

- 5 coffee keys + 1 flush key per group
- 2x coffee brewheads
- Aroma Perfekt brewhead
- 1 boiler (0.75 l) per brewhead, stainless steel, thermal insulation
- Hot water programme for tea: 4 different programmable water temperatures and amounts
- 2x stage steamer
- Stainless steel hot water and steam boiler (10 l), thermal insulation
- 7" touch screen (LCD 800 x 480)
- Number of programmable pressure curves [3]
- Programmable cup warmer
- Eco mode
- Automatic cleaning
- Delivery includes: 1 single cup and 2 double cup micro-sieves, 1 cleaning sieve, 1 brewhead brush

## Specifications

- Aroma Perfect brewhead with MicroSieve
- Coffee pressure profile input per head with a central pump: 5 amounts and pressure profile can be programmed per brewhead or manual operation can be used
- Pressure sensor: produces the same pressure on the coffee cake, even when the mill grade or the amount of coffee is different (controlled pressure curve)
- Multi-boiler system – temperature sensor for coffee boiler and brewhead capacity performance: 0,75L / 1000W per coffee boiler & 11L / 4000W for the hot water/ steam boiler
- 1 flow meter for the entire water system: for a precise measurement of water usage and to enable a better regulation of the water preparation system
- CWM – Coffee Water Management: integrated system for flow meter, vent system and pressure management
- Hot water
- 4 different programmable temperatures (from 60°C to 100°C). 4 different programmable amounts with two buttons
- Steam lever with two positions: graduated (pull) and full steam (push)
- Hardened glass cup warmer: adjustable performance from 0 - 100%
- Illuminated work area and rear wall (illumination adjustable from 0 - 100%)
- Display size: 7"- with touch screen
- Available in 2 and 3 group heads and in a high cup version

## Model Overview

Single cup	Double cup	Steam tap	Boiler volume (L)	Voltage	Performance (watts)	Weight (kg)	Width (mm)	Height (mm)	Depth (mm)	Colour
2	2	2	10	400	6.500	ca. 95	800	510	630	black and white
